And Now We Know It

We always thought Joe Ensky was a knocker. Last Sunday he buckled on his hammer and shotgun and rowed over to the flats to get a goose and nail some shingles on the duck house that is being built by local gunners. Well he did it. He got both geese and ducks and nailed all the shingles on the duck house, which is knocking some, even for Joe.

Black Fox Returns

The Black Fox returned Monday evening from the headwaters of the Iskut where she took a party to the mines of the Iskut River Mining Co. She will make another trip to the mines as soon as the Canadian Geological official reaches here from Prince Rupert where he was obliged to stop on account of illness.

Cute Boy.

Widow Eames—How would my little Johnny like a new papa?

Johnny (aged five)—Oh, you needn't share the 'spensibility on me, ma. It isn't a new papa for me, but a new husband for yourself, that you are thinking about.

CORE OF THE EARTH.

It May Be a Mass of Steel Some 5,580 Miles In Diameter.

Various conjectures have been made from time to time by geologists as to the possible condition of the center of the earth. One of the most popular impressions seems to be that the earth's center, or core, is a flaming furnace. At a meeting of the Seismological association at The Hague Professor Welcher asserted that his studies of the varying velocity of earthquake tremors passing through the interior of the globe had led him to the conclusion that the earth consists of a central core of iron or steel, about 5,580 miles in diameter, surrounded with a stony shell 930 miles in thickness. Between the outer solid rind and the inner layer of rock, covering the metallic core, he thinks there is a layer of liquid or plastic material, lying a little less than twenty miles below the surface of the earth.

Men sometimes dream of enormous wealth stored deep in the earth below the reach of miners, but experts now aver that there is little or no ground to believe that any valuable metallic deposits lie very deep in the earth's crust regardless of Professor Welcher's beliefs to the contrary. Such deposits, it is said, are made by underground waters, and owing to the pressure on the rocks at great depths the waters are confined to a shell near the surface. With few exceptions ore deposits become too lean to repay working below 3,000 feet. Nine mines in ten, taking the world as a whole, are poorer in the second thousand feet than in the first thousand, and poorer yet in the third thousand than in the second.—New York World.

Then He Got His.

She—I consider, John, that sheep are the stupidest creatures living. He (absentmindedly)—Yes, my lamb!

Divers Busy

Underwriters Busy On Ramona Wreck

Early Friday morning, the Delhi which had been near the wreck of the Ramona since last Monday morning, came to Wrangell and landed Capt. Taaffe, who was sent here to await the arrival of the Humboldt from Seattle, which was bringing Capt. General, Supt. of the Pacific Coast Steamship Co., Capt. McNoble, Insurance adjuster and Capt. Finch and sons who are doing the diving for the Company.

Soon after the Humboldt landed Saturday afternoon, the Toledo, chartered for the occasion from the Pacific Coast and Norway Packing Co., of Petersburg, came down and at one o'clock next morning left for the scene of the wreck with the officials aboard.

Tuesday evening the Toledo came back from the wreck having been favored with a fine day for the diving. The bullion was located and recovered fifteen minutes after the divers descended. One bag of registered mail was recovered. \$5000.00 in banknotes which were in the Purser's room were not found.

The Humboldt going south early Wednesday morning took the party back to Seattle.

Trip To Farm

A trip to the farm from Wrangell has a very different meaning than it does at most cities. Last week, Al Asborn went over to his farm on Farm Island. The trip was not made in the usual farm wagon. The inevitable boat used instead and necessarily. While there, he dug some of the finest spuds and turnips that one could wish for, which he sacked up and brought back to Wrangell. Besides the regular farm products above mentioned, he brought back a dozen geese of the Stikine River Honker variety, a kind that requires very little care to raise and just a little more to harvest.

How many places are there that you take a boat to go to the farm and how many farms are there that you can go to and get a dozen fat geese for the shooting.

An Old Smallpox Cure.

The following primitive "cure" for smallpox was discovered by the Leytonstone (England) guardians in one of their registers for the year 1700. "Take thirty to forty live toads and burn them to cinders in a new pot, then crush into a fine black powder. Dose for smallpox, three ounces."

He Lumped It.

"My coffee is not quite sweet enough," remarked he.

"Well, if you don't like it I suppose you'll have to lump it," said she, with a smile, passing the loaf sugar his way.

A State Secret.

"I hope your husband has no secrets from you."

"Not many. However, he never would tell me what he paid for the engagement ring."—Kansas City Journal.

THE FOURTH DIMENSION.

To Catch a Glimpse of It Just Get Delirium Tremens.

The majority of us are like brutes. We believe but in the reality of things. Science, more hospitable, acknowledges the fourth dimension and with it the constant parade before our eyes of things and events ordinarily unseen. The phenomena of delirium tremens forms a case in point. The shapes which the layman believes the patient only imagines are really seen and are rendered visible through the excitation of the pineal gland, which now is the rudimentary organ of what once was psychic vision. Alcohol stimulates this gland. The drunkard in his aftercups sees with it the hideousness of shapes which his own hideousness has attracted to him. For they are there, or, rather, they are here, about us in the fourth dimension, precisely as there are other shapes as gracious as these are revolting. Only ordinarily we do not see them. There are, though, those who can and do, and without being drunkards either.

Thinkers as sober as Jevons and Babbage go a bit further. They will, if you let them, tell you that whatever occurs in the privacy of a room remains photographed in it. A mere extension of this enables oculists to say that nothing has ever occurred anywhere which is not also photographed: that in the ether above us is the great picture gallery of the world.

In India, at Adyar, the chief lieu of theosophy, this gallery is constantly being studied. The results, occasionally bizarre, are sometimes trivial. It has been found that Herbert Spencer was Aristotle; Gladstone, Cicero; Tennyson, Ovid.—Edgar Saltus in Forum.

The Clock.

Ma—Is the clock running, Willie? Willie—No, ma; it's just standin' still an' waggin' its tail.—Judge.

Service Irregular

Owing to the wreck of the Ramona and the Dolphins losing a wheel, the freight and passenger service to Southeastern ports will be irregular for some time.

The Northwestern and Alameda will again take the outside route leaving only the Jefferson, Humboldt, City of Seattle and the delayed Dolphin plying inside.

Another Started

Tuesday morning J. G. Grant put a crew of men at work on a building between M. Hale's curio store and the Wrangell Hotel. The building is to be 24x50 feet and will be finished for a retail establishment.

An Afterthought.

"Ye-es," remarked a young husband at breakfast, "these biscuits are pretty good, but don't you think there ought to be a little more?"

"Your mother made them," interrupted the wife quickly. "—of them" ended the husband, with a flash of inspiration.

Man is his own star, and that soul that can be honest is the only perfect man.—Fletcher.

Notice of Application for Patent

Mineral Application No. 01473

United States Land Office at Juneau, Alaska, September 2, A. D. 1911.

NOTICE IS HEREBY GIVEN, That the ALASKA GARNET MINING & MANUFACTURING COMPANY, a corporation, whose Post Office Address is Minneapolis, Hennepin County, Minnesota, has this day filed its application for a patent for the following described Lode mining claims and mines bearing Garnet and other valuable mineral, all constituting one group of claims, contiguous to each other, situate in the Wrangell Mining District, near Wrangell, Alaska, to-wit:

1500 linear feet of the RUBY lode mining claim with 600 feet of surface ground, being 300 feet on each side the center of the lode; an area of 20.216 acres;

1500 linear feet of the RUBY NO. 2 lode mining claim with 600 feet of surface ground being 300 feet on each side the center of the lode; excluding that portion in conflict with RUBY lode, being a net area of 17.693 acres;

All designated by the field notes and official plat on file in this office as Survey No. 951, the particular descriptions thereof being as follows, with magnetic variation at 30 deg. 05 min. East, viz:

RUBY LODE CLAIM: Beginning at Cor. No. 1, a spruce post 6 ins. square, 5 ft. long, set 2 1-2 feet in the ground, surrounded by a mound of stone 2 1-2 feet base, 2 feet high, scribed 1-951;

Thence S. 3 deg. 28 min. E. 42.50 ft. to Cor. No. 6, a spruce post 6 ins. square, 4 1-2 ft. long, set on bed-rock in shelf on rocky slope, and surrounded by a mound of stone 3 ft. base, 2 ft. high, scribed 1-951;

Thence S. 3 deg. 28 min. E. 42.50 ft. to Cor. No. 5, on face of a precipitous rock slope, a cross (x) at corner point and 5-951 chiseled along-side;

Thence S. 45 deg. 09 min. W. 111.51 ft. to Cor. No. 5, on face of a precipitous rock slope, a cross (x) at corner point and 5-951 chiseled along-side;

Thence S. 3 deg. 28 min. E. 42.50 ft. to Cor. No. 6, a spruce post 6 ins. square, 4 1-2 ft. long, set on bed-rock in shelf on rocky slope, and surrounded by a mound of stone 3 ft. base, 2 ft. high, scribed 1-951;

Thence S. 3 deg. 28 min. E. 42.50 ft. to Cor. No. 7, a cedar post 4 1-2 ft. long, 5 ins. square, set 15 ins. in the ground, surrounded by a mound of stone 3 ft. base, 3 ft. high, scribed 1-951;

Thence S. 3 deg. 28 min. E. 42.50 ft. to Cor. No. 8, a hemlock post 5 1-2 ft. long, 5 ins. square, set 12 ins. in the ground, surrounded by a mound of stone 3 ft. base, 3 ft. high, scribed 1-951;

Thence S. 3 deg. 28 min. E. 42.50 ft. to Cor. No. 9, the place of beginning: Containing 20.216 acres.

RUBY NO. 2 LODE CLAIM: Beginning at Cor. No. 1, a spruce post 4 1-2 ft. long, 6 ins. square, set 20 ins. in the ground, surrounded by a mound of stone 3 ft. base, 1 1-2 ft. high, scribed 1-951; whence U. S. L. M. 8-Wrangell bears N. 53 deg. 53 min. W. 584.86 feet;

Thence S. 3 deg. 28 min. E. 450.55 ft. to Cor. No. 2, a hemlock post 4 ft. long, 6 ins. square, set 10 ins. in the ground, surrounded by a mound of stone 3 ft. base, 2 1-2 ft. high, scribed 2-951;

Thence N. 3 deg. 28 min. W. 600 ft. to Cor. No. 4, a steel drill 5 ins. long, 1-2 inch in diameter, set 3 ins. in the solid rock, with post set in mound of stone along-side, marked to indicate the corner point, chiseled alongside 4-951;

Thence S. 3 deg. 28 min. W. 600 ft. to Cor. No. 5, not set as it falls in Garnet Creek; Witness Cor. to Cor. No. 5 bears S. 3 deg. 28 min. E. 33.84 feet;

Thence S. 3 deg. 28 min. E. 443.45 ft. to Cor. No. 6, identical with Cor. No. 7 of RUBY LODE, a cedar post 4 1-2 ft. long, 5 ins. square, set 15 ins. in the ground, surrounded by a mound of stone 2 1-2 ft. base, 2 ft. high, scribed 7-951;

Thence S. 3 deg. 28 min. W. 899.84 ft. to Cor. No. 1, the place of beginning: Containing 17.693 acres.

The notice of location of these claims are recorded in the office of the District Recorder for the Wrangell District at Wrangell, Alaska, as follows, to-wit:

RUBY lode claim, Original location notice, in Book 13 of Mining Locations & Water Rights on page 337;

The Orange in Spain.

It is considered a very healthful thing to eat an orange before breakfast. But who can eat an orange well? One must go to Spain to see that done. The señorita cuts off the rind with her silver knife, then, putting her fork into the peeled fruit, she detaches every morsel with her pearly teeth and continues to eat the orange without losing a drop of the juice and lays down the core with the fork still in it.

Unpalatable.

The Rev. Charles H. Spurgeon was fond of a joke, and his keen wit was, moreover, based on sterling common sense. One day he remarked to one of his sons:

"Can you tell me the reason why the Huns didn't eat Daniel?"
"No, sir. Why was it?"
"Because the most of him was backbone and the rest was grit"—Youth's Companion.

Going the Rounds.

Husband of Tomorrow (reviewing wedding presents)—That awful cruel seems familiar. Wife of Tomorrow—Yes, dear, you saw it at the Browns. They got it as a wedding present and gave it to the Smiths at theirs. It's the Smiths' present. But never mind, dear; Harry's wedding comes off soon!—London Opinion.

School Notes

Two additional pupils, Elsie Sylvester and Elfrida Emery were enrolled this week.

The Senior Class is wrestling with the intricacies of partial payments.

The Current Event class solicits contributions of Magazines. Any one who has some, please notify us and we will call for them.

The pupils of the Primary room are correlating language and drawing and are making up booklets of which they are exceedingly proud. Much artistic talent is evinced by the pupils of both Departments.

Our rooms are brightened by many beautiful flowers that are cultivated in the gardens of Wrangell. We venture to say that Holland, the land of Dahlias, can produce no more beautiful ones than are grown in our city.

Capt. Peterson, of the Star of Greenland, and Capt. Hyvarinen, of the Chilkat, visited our school Wednesday.

A Big Time

The celebration after the completion of the season's pack of the Wrangell Cannery, otherwise the Alaska Packers Association, by Bobby Burns.

Well now what do you think
We will not speak it loud;
Wrangell was represented
With a large and jolly crowd.
The best of our citizens
Had mingled all together
And said, yes, you bet we'll go
In any kind of weather.
The decorations were complete
And nothing left to slip,
For it was done by Peterson
The Captain of the Ship.
And there was Mr. Gladden,
The book-keeper good and true,
Who dished out the refreshments
And knew just what to do.
And say, you should have seen our
Editor,
A man who never brags;
Well do you know, he won a prize.
By simply wearing rags.
And Mrs. Leonard whom we know,
At the front and never lags,
Won five dollars in pure gold,
For she was dressed in rags.
And there was Mr. Loftus,
A shef of Wrangell fame,
Who fixed up the best of Coffee
And sandwiches quite game.
And the proprietor of the Wrangell Hotel,
Who answers all the calls,
Was there with his wife to jolify
And was dressed in overalls.
And the Superintendent,
Who never speaks out loud,
Was there in prompt attention
To mingle with the crowd.
And there was Capt. Hyvarine,
Who is not to tall or fat,
Who we think is the only man
To run the tug Chilcat.

Bobby Burns.

New Map of Florida

Remarkable Offer by the National Tribune

The National Tribune of Washington, D. C., the great weekly published in the National Capital and the organ of the old soldiers and the G. A. R., has just had prepared a new map of Florida, the State which is now the center of interest among all who are tired of the sudden changes from torrid heat in Summer to Arctic cold in winter, and who want a home where the climate is healthful and opportunities are offered to earn a livelihood or acquire wealth under the most favorable conditions.

The population of Florida increased nearly 50 per cent in the last decade, and will double in the next.

This map The National Tribune has had compiled from the latest surveys of the Government engineers and from recent data of the Postoffice Department and lithographed in three colors on a fine quality of plate paper, 28 by 30 inches.

This map will be sent free to any one who will write to The National Tribune and enclose 7 cents in stamps for postage.

Whether you own property in any part of Florida, or are merely interested in the rapid development that is going on in the Peninsula State, this map will be of both interest and value to you, and all you have to do to get it, is to send 7 cents in stamps, merely to defray the cost of mailing, and the map will be sent to you at once, securely rolled in a stiff tube.
